# New Railroad Will Be Built

## Work May Be Started by Sept. 1st. All Financial Arrangements Now Being Closed Up. Means Much to this city.

The Appalachian Interurban Railroad will be built.

T. C. McNeely, now in New York City, and where he has been during the past few months making the arrangements for the financial end of this gigantic enterprise, wires that everything is going satisfactorily. The necessary finances will be forthcoming, a guarantee will be furnished, and construction work will begin very soon—possibly by September first.

This is great news for Henderson county, to which the building of this new road means so much, and it must be gratifying to the many thousands who have never lost faith in the gigantic enterprise to know that their faith has been well founded.

When the Appalachian Interurban Railroad is built, as it will be soon, this county and this part of the state will blossom as the rose. Resources now untouched will be developed, and Hendersonville and Henderson county will come into their own. A measure of prosperity surpassing all expectations will surely follow, and then will be realized the dream and the ambition of many—10,000 population for Hendersonville by 1910.

## Expert Testimony

"Your Horse Show is fine and Hendersonville should be very proud of it," said Secretary Randolph, of the Asheville Board of Trade to a Hustler man today. "Yes," chimed in Col. Jim Wood, distinct passenger agent of the Southern Railway. "And Hendersonville beats Asheville a block on two things, her streets and side-walks. Your Main street is fine and the side-walks are the prettiest I ever saw."

Just what everybody says. And yet there are some folks who object to completing the improvement—the greatest ever proposed in the history of the town.
